Definitions

New Route : A route is considered new

- When it was not operated by regular flights over the previous two seasons.
- When the international airport linked to Morocco should not belong to an already served airport system.

New frequency : A frequency is considered new

When an airline starts that frequency on an exiting route.

Additional frequency : A frequency is considered as an additional frequency.

- When an airline increases their frequencies comparing to with the previous similar season.

Movement : a take-off (Departure) or landing (Arrival) realized by an aircraft in an airport of the ONDA's network.

Frequency : cycle of movements of arrival and departure realized by an aircraft. A frequency corresponds consequently to two movements: the movement of departure (to go) and the movement of the arrival (return).
